SCREENSHOTS OF IMPLEMENTATION

TASK 1- Console Application with Hello World:

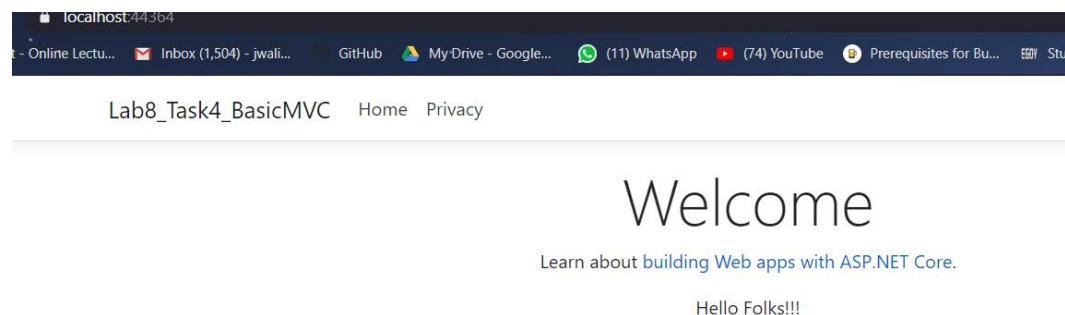

```
C:\Windows>d:

D:\>cd D:\Semester5\WDDN\lab\lab8_lab\ConsoleApp_1

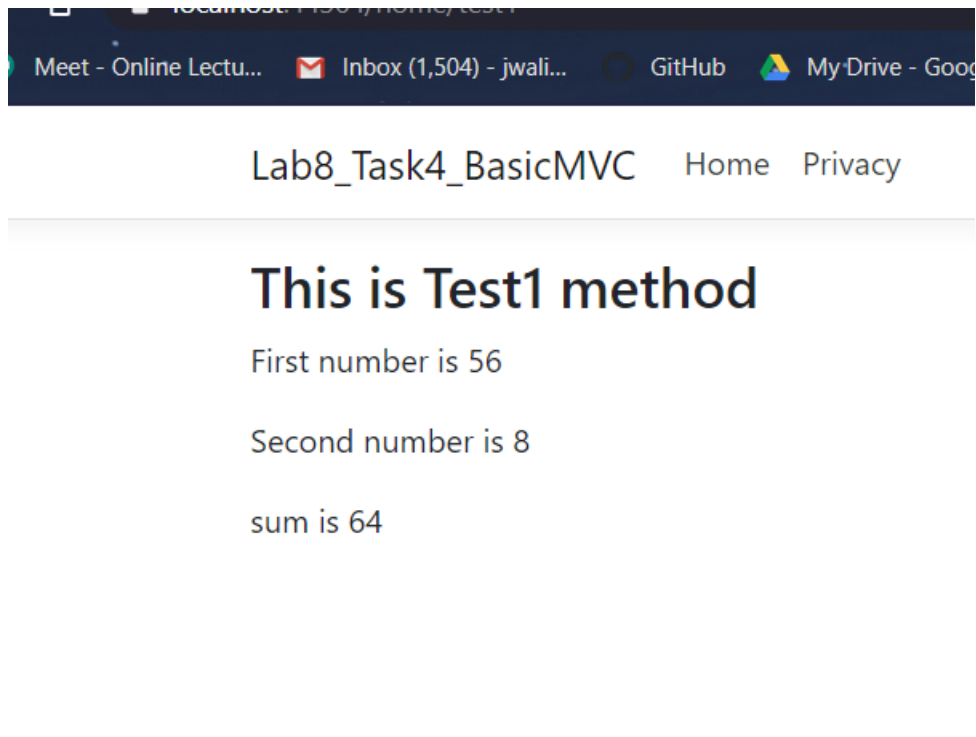

D:\Semester5\WDDN\lab\lab8_lab\ConsoleApp_1>dotnet run
Hello World !! Hello Folks !!

D:\Semester5\WDDN\lab\lab8_lab\ConsoleApp_1>
```

Task2- Hello World MVC Application

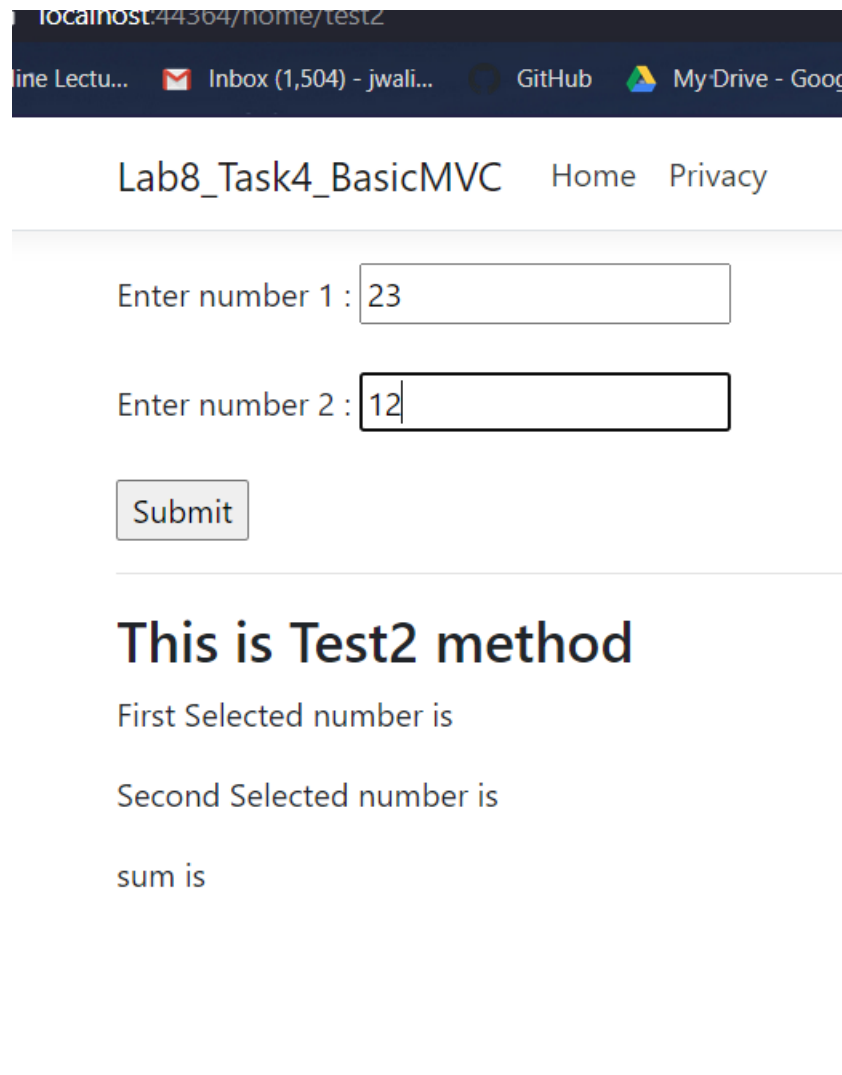

Task3- Test1 Action method which sums two numbers & displays on Test1.cshtml

Task4- Test2 Action method which takes input from user and sums it and display it on to the view again.

Enter number 2 :

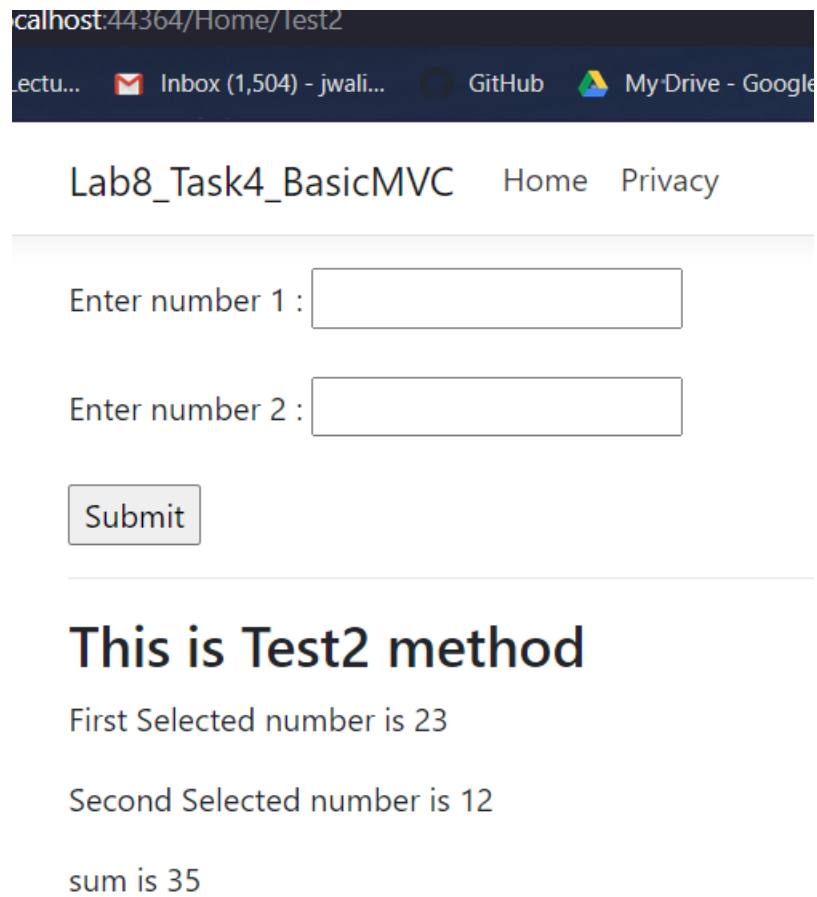

This is Test2 method

First Selected number is

Second Selected number is

sum is

2.

The screenshot shows a web browser window with the address bar displaying "localhost:44364/Home/test2". The browser's tab bar includes "lectu...", "Inbox (1,504) - jwali...", "GitHub", and "My Drive - Google". The web page has a header with the title "Lab8_Task4_BasicMVC" and navigation links for "Home" and "Privacy". The main content area contains two input fields for numbers, a "Submit" button, and a summary of the results.
